Operations and SEO

Technical SEO audits, GA4/GTM implementation, Core Web Vitals optimisation

Tools and infrastructure

Git/GitHub, VS Code, Figma, Linux (Ubuntu), Cloudflare, Cloudways, Adobe Creative Cloud

Professional experience

Web developer and technical operations

Woven & Woods - August 2021-present

Web developer and sole technical lead for a London-based flooring retailer with showrooms in Twickenham and Richmond. Responsible for custom WordPress development, WooCommerce catalogue architecture, front-end implementation, hosting, analytics, SEO and internal tooling, translating commercial, marketing and operational requirements into maintainable website improvements.

Key achievements

Developed a bespoke WordPress/WooCommerce catalogue theme using PHP and ACF Pro, supporting several hundred product ranges with structured taxonomies, reusable content sections and responsive front-end layouts.

Delivered front-end improvements, content updates, SEO fixes and technical changes on a live commercial site, balancing day-to-day stakeholder requests with larger development projects, QA and deployment.

Built a React/Vite tool to replace manual spreadsheet editing, converting product database exports into import-ready formats for WooCommerce, Simpro CRM and showroom ticketing software, saving several hours each week and reducing data errors.

Managed technical SEO, maintaining first-place Google rankings for core commercial terms and mobile performance scores in the high 90s.

Used Git/GitHub, local development and managed hosting environments to develop, test and deploy theme, content and performance improvements.

Legal assistant

Stevens & Bolton - 2018-2021
Woodford Stauffer - 2016-2018
GCL Solicitors - 2014-2016

Earlier legal career in property and commercial litigation, developing strong attention to detail, client communication, documentation and QA skills.

Content producer

Rapanui Clothing - 2011-2014

Produced digital content for a commercial fashion brand, developing an early understanding of brand, content and conversion.

Projects

Woven & Woods

wovenandwoods.com - Private repository

Bespoke WordPress/WooCommerce catalogue for a south-west London flooring retailer, with custom theme development, advanced search/filtering, structured product content and SEO-focused lead generation.

Bantu Learn

Development build available on request. - Private repository

Custom WordPress/WooCommerce learning platform using ACF Pro to structure course content and virtual products for scheduled language course bookings.

The Gallimaufry

thegallimaufry.show - GitHub: <https://github.com/willjacksonuk/thegallimaufry-website>

Astro podcast site using the Buzzsprout API at build time and deployed via Cloudflare Pages, demonstrating API integration, static generation and modern deployment workflows.
